
INSTALLING LOGS

Some logs have pins and holes to help secure them in place. If applicable, place pin in the hole of the log is it being placed on. See instructions and illustrations below for proper placement.

MODEL B30EL-1

1. Insert log #1 into slots in rear log bracket.
2. Place log #2 onto left side of grate assembly.
3. Place log #3 onto right side of grate assembly.
4. Place log #4 onto logs #1 and #3.
5. Place log #5 onto logs #1 and #2.
6. Place log #6 onto logs #4 and #3.
7. Place log #7 onto logs #5 and #2.
8. Place log #8 onto logs #1 and #2.

⚠ CAUTION: After installation and periodically thereafter, check to ensure that no yellow flame comes in contact with any log. With the heater set to High, check to see if yellow flames contact any log. If so, reposition logs according to the log installation instructions in this manual. Yellow flames contacting logs will create soot.
